WordPress is a free publishing platform based on PHP and MySQL. It is used by over 14.7% of websites and is currently the most popular blogging platform in use on the web. It comes with handy features designed to make the user's experience as a publisher as easy and appealing as possible. It comes with many standard compliant features that make it fast, light and flexible content management system.

Our [WordPress Training in Delhi](#) is recommended for beginners and intermediates php programmer with keen interest in learning this key technology. We cover many aspects of WordPress including overview, installation, configuration, setting up a PHP WordPress development environment, plugins, hooks, actions and filters, activation code, templates, widgets, admin interface, database security, jQuery, AJAX, security and live project training. We provide deep level training in wordpress apart from other training center. Cover all coding parts in wordpress ,So after training you can create any level of wordpress site from scratch from HTML to WordPress, Custom plugins, Widget Development.

Nowadays increasing no. of web development CMS ,So it is hard to decide which CMS or framework is good for developing projects. Well Choosing a CMS depends upon the client requirement .check below Why we should use WordPress or Why WordPress is getting popularity day by day

- WordPress has easiest admin panel to manage site features like best admin editor that save post/page in draft mode ,media uploading system,easy navigation access.
- In current web it is considered to be good SEO optimized. WordPress have lots of features like tags, next,previous page link, All in one seo plugins,media alt,title define and many more.This all helps WordPress to increase ranking of the site in any search engine. check to [improve seo](#)
- Performance or loading time os site is also matter for visitors or ranking in search engine. WordPress considered on of the best high performance CMS
- If someone know PHP ,he/she can easily develop any websote in wordpress without too much learning curve.So wordpress has no more learning curve like others Drupal.
- It has more than 25 thousand of plugins that help to build site robustly in less time.and even growing .[best plugins](#), [wordpress all plugins](#)
- WordPress have good forum,blog support ,So anyone new to WordPress can get support from all around the world online.it has own [WordPress stackexchange](#)
- Finally from client side of view or developer side of view wordpress is one of the best web development CMS

Although WordPress is good CMS but it has it's own limitation like such project that have many relation in content with each other do not consider to build in wordpress .Even if have to build large content/pages also do not preferred in wordpress.see some [other review](#)

Our training sessions are designed to assist students to get the benefit practical sessions. The practical sessions involve doing assignments and learning by writing code. We are Best WordPress Institute providing more practical and deep level training in wordpress. We are transparent in our saying,so we listed here all our students with contact no. even anyone can inquiry to them. We know that no any other training center list this because they only got admission from there big advertising. But Training session are worst because of trainer itself only academic , more than 20 students in a batch etc .

We have our different image apart from other training institute, We have Trainer cum Web Developer to providing training ,we include only 6/7 students in a batch. Each day have assignment, and after checking assignment individually we provide next class . I am Pawan Kumar Shah trainer and director of [www.w3-learn.com](#) and [www.unitedwebsoft.in](#)
